Mazda's automotive plans for the early sixties consisted of growing alongside the Japanese economy. To achieve this goal, they began by building an extremely affordable Kei car, the R360 in 1960, planning on introducing gradually larger and pricier cars as the Japanese customers became able to afford them. [citation needed] As a preview, testing the waters, a larger "Mazda 700" prototype was ...

The WOT Box makes no-lift shifting easy by cutting your engine's ignition for a very short period while you no-lift shift. No-lift shifting is keeping the gas down through the shift. The ignition cut allows the synchros in your transmission to mesh easily, reducing the chance of missing a gear and damaging your transmission.
