Photosynthesis is a process used by plants and other organisms to convert light energy into chemical energy that can later be released to fuel the organisms' activities. This chemical energy is stored in carbohydrate molecules, such as sugars, which are synthesized from carbon dioxide and water - hence the name photosynthesis, from the Greek φῶς, phōs, "light", and σύνθεσις ...

How to Read a Ruler - Inch Calculator

1. Solving for a single variable in a first degree equation. In an equation such as $a = b / c$ being able to solve for a, b, or c correctly is extremely important. The most common mistake in this situation is thinking that the solution in the case of solving for c is not recognizing that $c = b / a$. Way too often students think that the value for c is equal to a / b .
